Gold / Silver Raise Foiling Design

Important Instructions for Foiling

1. Foiling matter / design should not be present in printing design.
2. Foiling and UV portion should not be in Cutting or Creasing area.
3. For optimum results of foiling, minimum text point size must be above 9 pt.
4. In design, line or graphics should be more than 0.5 pt thickness for foiling and UV.
5. Foiling & UV design should be in 100% black color only as shown above.
6. Foiling will be done on one-side only, even if printing is on both-sides.
So define on which side foiling is required.
7. Foil / UV may come off upon scratching by nail or sharp object.

Design Specifications

1. Designs should be of single page only in Corel Draw with fonts convert to curves.
2. Design size should be as per our job size. Final job will be less by 1 mm from all sides.
3. All important matter in the design should be at least 3 mm inside from all edges.
4. All colours & images must be in CMYK mode.
5. Do not set colours as "Overprint Fill".
6. All Drop Shadow, Contour, Blend, Bevel effects should be "Break Apart",
Convert all lens effect, Fountain Fill, Monochrome, EPS, OLE object & images
to 300 dpi CMYK bitmap.
7. Heavy patches in the design will cause set-off in NT jobs.
8. Please use lighter colour for 80, 90 & 130 gsm paper.
